

CAREER OBJECTIVE

Versatile Backend Engineer with strong foundations in scalable system architecture, CI/CD, and RESTful API development. Passionate about delivering reliable, secure, and performant services through modern DevOps practices, automated testing, and Agile methodologies. Committed to continuous learning and building solutions that drive real-world impact in data-driven and cloud-native environments.

PROFESSIONAL SUMMARY

Full-Stack Developer with a strong foundation in backend development, data modeling, and scalable cloud architecture. Experienced in designing robust ETL pipelines, integrating REST APIs, and managing structured and unstructured data across modern stacks. Skilled in leveraging cloud platforms (AWS, Azure), SQL/NoSQL databases, and AI APIs to power analytics, reporting, and business automation. Adept at building data-driven applications and collaborating with cross-functional teams in Agile environments.

EDUCATION

De La Salle University Manila – Manila, Metro Manila

Bachelor of Science in Information Technology (2020 – 2024)

- **CGPA:** 3.43, Cum Laude
 - **Consistent Dean's Lister**
 - **Relevant Coursework:** AI & ML Applications, Web Development, Database Admin, Mobile Dev, Network Infrastructure, Cloud Services, Security, Agile Project Management
-

SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript, Python, SQL
 - **Frameworks:** Spring Boot, Node.js, Express.js, Ruby on Rails
 - **Databases:** PostgreSQL, MySQL, DynamoDB, Supabase, Snowflake
 - **Cloud & DevOps:** AWS (Lambda, EC2, S3, API Gateway), Azure, GitHub Actions, Docker, Kubernetes, AWS CDK
 - **Testing & Automation:** Postman, CI/CD pipelines
 - **Security & Authentication:** OAuth 2.0, JWT, IAM
 - **Other Tools:** Git, VS Code, Cursor AI, Android Studio, Jira, Figma
 - **Soft Skills:** Adaptability, Critical Thinking, Leadership, Attention to Detail, Communication, Proactive
-

PROFESSIONAL EXPERIENCE

Junior Fullstack Developer - Contractual

xFusion, Makati, Metro Manila | Feb 2025 - April 2025

- Built a multi-platform data extractor using Node.js and Puppeteer to collect product data from 50+ e-commerce sources
- Integrated OpenAI and Claude APIs to extract insights, classify products, and enhance dashboard analytics
- Engineered cloud-based REST APIs and ETL pipelines using AWS Lambda, API Gateway, and CDK for high-throughput data processing serving 20,000+ users
- Designed and maintained schema for product analytics with DynamoDB, Snowflake, Cube, and Snowpipe

Local IT Intern

ING Hubs Philippines, Makati, Metro Manila | Oct 2024 – Feb 2025

- Automated endpoint provisioning across 1,000+ devices, reducing configuration time by 50%.
- Ensured secure credential handling and compliance with IT risk standards.

Junior Software Developer

Navitaire, an Amadeus Company, Taguig, Metro Manila | Sept 2023 – Dec 2023

- Contributed to Angular components that pulled dynamic data via backend APIs
- Collaborated with QA and DB teams to ensure consistency between frontend and backend datasets

IT Intern

Accenture Philippines, Mandaluyong, Metro Manila | Jul 2022 – Sept 2022

- Developed an augmented reality (AR) prototype to render 3D objects using Microsoft Power Apps + custom connectors, providing interactive product previews for client demonstration

Activities Executive

De La Salle University Student Government – College Batch 2T24, Manila, Metro Manila | Mar 2021 – Sept 2021

- Managed 5 university-scale events and ensured cross-org collaboration success
 - Supported 10+ student initiatives to ensure smooth operations and successful outcomes.
-

PROJECTS

Practrack

Technologies: Angular, Node.js, Supabase

- Developed an intelligent practicum management system that reduced administrative workload by 50%. Integrated AI-powered analysis using OpenAI to assess company descriptions and detect partnership favorability based on alignment with school values and student feedback. Built secure document handling, role-based access control, and decision-support modules.

Profs To Pick

Technologies: Node.js, MySQL

- Led backend architecture and database schema design for a course selection tool. Built SQL queries and backend logic to score professors based on aggregated feedback. Delivered complete API layer for frontend integration.

PlantMate

Technologies: Kotlin, Firebase

- Directed development of a Firebase-backed e-commerce app with real-time product tracking and usage analytics. Implemented structured storage of order and user data to support client reporting and internal dashboards.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals | Microsoft | Dec 2024
- Blockchain and Bitcoin Fundamentals | Udemy | Oct 2024
- The Complete 2024 Web Development Bootcamp | Udemy | Dec 2023
- AWS Academy Graduate - Cloud Foundations | AWS Training | Jul 2023
- CCNA: Introduction to Networks | Cisco | Sept 2021
